PIPELINE CONSTRUCTION SERVICES

Major Pipeline Projects (MPP) Construction Services Group works with clients to determine the best services, deliverables and personnel that are required to complete individually customized projects. From R.O.W. staking, engineering and as-builts through to testing and final welds, MPP will ensure that the client's expectations are exceeded. We are continually innovating processes to streamline and reduce costs of projects. The MPP Group utilizes knowledgeable personnel, data acquisition, data processing and in-house software. We provide economic, safe and practical services which successfully fulfill all clients' pipeline construction requirements.

Utilizing four service groups, MPP offers products and services for:

- Pipeline Pre-Construction
- Pipeline Construction
- Pipeline Integrity
- Pipeline Data Management

If your pipeline is in the regulatory pre-planning, engineering design, construction or operating stage, MPP will meet your survey and geomatics requirements safely, timely and cost-efficiently.

Pipeline Construction Services

CONSTRUCTION SERVICES:

- Pre-construction R.O.W. staking
- Pipe data (Stock pile site)
- Ditch line staking
- Engineering design layout
- Reference/Progress chaining
- As-weld pipe data
- Pipe as-built
- Materials as-built
- Facility as-built

DELIVERABLES:

- Hydro testing data and plans
- Caliper tool data and correlation
- Materials reconciliation
- Final grade surveys
- As-built crossing drawings
- As-built survey notes
- As-built alignment sheets
- As-built pipe data
