The addition of a UAVs (Unmanned Aerial Vehicles) to our Virtual Survey Solutions means we now have the capability to collect survey grade aerial imagery and 3D terrain models in an efficient, effective, and accurate manner. This geo-referenced data has resolutions as sharp as 1.5 cm per pixel, providing crystal clear imagery for a variety of applications in the oil and gas, mining, and municipal sectors.

For a price quote or more information about our UAV services, please contact us today at sales@midwestsurveys.com
